

PROPHYLACTIC COVERS FOR DENTAL INSTRUMENTS  
AND METHODS FOR MAKING THE SAME

## ABSTRACT OF THE DISCLOSURE

5 A prophylactic system 100 for a dental hand piece 101  
of a selected shape and having an outlet 112 for providing a  
fluid to an operating field is disclosed. A cover 102 has a  
shape substantially similar to the hand piece 101 for  
enclosing the dental hand piece 101 and includes an aperture  
118 for communicating with the operating field. An s-shaped  
10 valve 600 includes a path 605 for coupling the fluid from  
outlet 118 of the hand piece 101 to the aperture 118 of the  
cover.
